BRUSHING

Use a wet BRUSH - Enjoy the GIFT OF A WET BRUSH With any new INITIAL INSTALL APPOINTMENT - COMBS are NOT RECOMMENDED AT SCALP

- Girl, brush your hair twice a day from root to tip .

Brushing is very important. Brush twice a day, once before you shower and in the morning or before bed. Brush your hair starting at the ends, working your way up towards roots, hold hair in a ponytail while brushing ends to avoid excessive pulling. Make sure you are very gentle with brushing to avoid hair snapping, breaking off or causing the hair to shed prematurely from the weft.

SHAMPOOING - shampoo and condition every other day or 2-4 times per week, too much washing will dry out the hair. Wash in lukewarm water, never hot. DO NOT SHAMPOO VIGOROUSLY - SHAMPOO IN A ROPE STYLE ALL HAIR DOWN, CONDITION THE SAME WAY NEVE PILE HAIR ON TOP HEAD AND SHAMPOO MUST BRUSH THOROUGHLY THROUGH ALL THE HAIR TO REMOVE ANY TANGLES BEFORE SHAMPOOING. USE UNITE DRY SHAMPOO IN BETWEEN DAYS (QUICK TIP) WASH ONLY THE TOP OF HEAD/Scalp area ... IF THAT IS ALL YOU HAVE TIME FOR)!

ALWAYS USE A CONDITIONER NOT ON SCALP MIDS AND ENDS ONLY- Use conditioner every time you shampoo 2-4 times per week or every other day, UNITE offers 3 different dry shampoos. CLEAR, VOLUME, AND EXTRA DRY shop here www.violetzdesign.com TAP “shop products”

*UNITE NOW SELLS AN EXTRA DRY SHAMPOO FOR ALL US EXTRA SWEATY BABES

You will need to use these products to keep your extension hair from drying out- oil at least once a day

Use oil daily on wet and dry hair to avoid dryness

*refer to NBR care form on how to take care of extensions after installed

NEVER AIR DRY [\(I know you already hate me \) lol ... here's why your scalp will itch from the little return hairs at the top of your extension wefts ... xo](#)

Please use all your new products and blow dry and enjoy all the aromas

My most used styling tip -MY FAVORITE HAIR COCKTAIL: BEFORE STYLING WHEN WET- UNITE LEAVE IN CONDITIONER SPRAY THROUGH MIDS +ENDS, UNITE ARGAN OIL 1-2 PUMPS MIXED WITH UNITE SMOOTH + SHINE CREAM

BLOW DRY ALL THE WAY - TO AVOID MATTING AT THE TOP OF WEFTS -AVOID A MILDEW SMELL-BLOW DAY AS MUCH AS YOU CAN -I DON'T AIR DRY BECAUSE I WANT A SMOOTHER LOOK -BUT SOME DO AIR-DRY -I PERSONALLY DON'T

HOT TOOLS-

Your extensions will react to heat just like your natural hair does. You may use tools such as flat irons, curling irons, beach waves, dyson airwrap and dyson blow dryers.

*BLOW DRY STRAIGHT DOWN FOR SMOOTHER FINISH

ALWAYS USE A HEAT PROTECTANT BEFORE ANY HOT TOOLS -UNITE GLOSSING SPRAY IS RECOMMENDED

STYLING: RECOMMENDED DYSON BLOW DRYER +BIO IONIC CURLING IRON+GHD PROFESSIONAL FLAT IRON

BE MINDFUL OF YOUR HOT TOOL TEMPERATURES: BLONDES USE BETWEEN 250-280 DEGREES

PROFESSIONALLY RECOMMENDED : PLEASE BE AWARE -THIS IS NBR + IBE MAINTENANCE
Move ups EVERY **6-9 weeks**

I do not recommend any longer than 6-9 weeks

WHEN RISKY BUSINESS HAPPENS

beads slipping out

slipping, pulling tension on the scalp, BALD spots, loose wefts more than usual

Too much tension can cause more hair to fall out

Premature shedding of wefts

ALL these factors may cause damage

I or Violetz Design Salon am not responsible for any person or salon trying to repair anything to extensions.

I highly recommend 6-9 weeks to avoid any of these emergencies and having to wait on an appointment

THANKS LOVES, trust me I know this is alot and I don't mean to sound insensitive at all but I care about your experience and I know its a huge investment and I want you to walk out of my salon yelling at the rooftops about your new extensions from how they make you feel to the service I give you. I'm here to help you sister feel sexy and confident.

Much love,..... You all know I'm a lover and I love you soooo much ... and I want the very best for ya Love, Tiffany Violet Penn
